

Complete Summary

TITLE

Homeless: percent of veterans discharged from one of three types of homeless programs who receive timely mental health (MH) or substance use disorder (SUD) specialty follow-up.

Brief Abstract

DESCRIPTION

This measure is used to assess the percent of veterans discharged from a specified homeless program who receive timely mental health (MH) or substance use disorder (SUD) specialty follow-up.

RATIONALE

The number of homeless male and female Vietnam era veterans is greater than the number of service persons who died during that war -- and a small number of Desert Storm veterans are also appearing in the homeless population. Although many homeless veterans served in combat in Vietnam and suffer from post traumatic stress disorder (PTSD), at this time, epidemiologic studies do not suggest that there is a causal connection between military service, service in

Vietnam, or exposure to combat and homelessness among veterans. Family background, access to support from family and friends, and various personal characteristics (rather than military service) seem to be the stronger indicators of risk of homelessness.

Almost all homeless veterans are male (about 3% are female), the vast majority are single, and most come from poor, disadvantaged backgrounds. Homeless veterans tend to be older and more educated than homeless non-veterans. But similar to the general population of homeless adult males, about 45% of homeless veterans suffer from mental illness and (with considerable overlap) slightly more than 70% suffer from alcohol or other drug abuse problems. Roughly 56% are African American or Hispanic.

Many of these Veterans are not currently enrolled in Veterans Administration (VA) or aware they are eligible for services. Resources have been provided by Congress to reach beyond currently enrolled veterans to identify homeless veterans and provide services to them. In FY 2003, VA provided services to approximately 100,000 homeless veterans, the majority through the auspices of its specialized homeless programs. VA specialized homeless services programs include the Health Care for Homeless Veterans program (HCHV) and its components (the Grant and Per Diem [GPD] program, the Supported Housing program, and the and the Housing and Urban Development - Veteran Affairs Supported Housing program [HUD-VASH]; the Domiciliary Care for Homeless Veterans program [DCHV]; and the Compensated Work Therapy / Transitional Residence program [CWT/TR]).

One of the major goals of the VA's homeless veterans treatment programs is to provide treatment and assistance to homeless veterans who have been living on the streets or in emergency shelters. A primary indicator that support services have been successful is that veterans achieve a stable residence (independent housing or within a treatment setting) following residential treatment. The Health Care for Homeless Veterans (HCHV) Program is a specially funded program that provides extensive outreach, physical and psychiatric health exams, treatment, referrals, ongoing case management and contractual residential care to homeless veterans with mental health problems including substance abuse. HCHV program staff outreach to large numbers of homeless veterans; a subgroup with substantial psychiatric or substance abuse problems is placed in residential treatment programs provided through, i) local contracts with community based providers, ii) the VA GPD program, or iii) the VA Domiciliary Care for Homeless Veterans (DCHV) program. This performance measure applies to those veterans who have been placed in residential care within these three programs.

PRIMARY CLINICAL COMPONENT

Homeless; access to mental health (MH) and substance use disorder (SUD) specialty follow-up clinics

DENOMINATOR DESCRIPTION

Number of homeless veterans who are discharged from a Contract Residential Care for Homeless Veterans, Grant and Per Diem (GPD) homeless program, or

Domiciliary Care for Homeless Veterans (DCHV) with a length of stay of at least seven days

NUMERATOR DESCRIPTION

Number of veterans from the denominator who receive timely* mental health (MH) or substance use disorder (SUD) specialty follow-up care after discharge

*Timely is defined as within 60 days after index date.

Evidence Supporting the Measure

EVIDENCE SUPPORTING THE CRITERION OF QUALITY

- A clinical practice guideline or other peer-reviewed synthesis of the clinical evidence

Evidence Supporting Need for the Measure

NEED FOR THE MEASURE

Users of care only

DESCRIPTION OF CASE FINDING

Homeless veterans who are discharged from a delineated homeless program.

DENOMINATOR SAMPLING FRAME

Patients associated with provider

DENOMINATOR INCLUSIONS/EXCLUSIONS

Inclusions

Number of homeless veterans who are discharged from a Contract Residential Care for Homeless Veterans, Grant and Per Diem (GPD) homeless program, or Domiciliary Care for Homeless Veterans (DCHV) with a length of stay of at least seven days

Exclusions

- Veterans already included in this performance measure in the previous six months at the same facility (Veterans Affairs Medical Center [VAMC]).

DENOMINATOR (INDEX) EVENT

Institutionalization
Patient Characteristic

DENOMINATOR TIME WINDOW

Time window is a single point in time

NUMERATOR INCLUSIONS/EXCLUSIONS

Inclusions

Number of veterans from the denominator who receive timely* mental health (MH) or substance use disorder (SUD) specialty follow-up care after discharge

*Timely is defined as within 60 days after index date.

Refer to the original measure documentation for additional details.
